A Brilliant Pair.

The Washington Union, the Presidential organ, which is not ashamed to avow itself wholly on the side of Slavery, is out with a strong endorsement of the scurrilous and vulgarities of Bennett's Herald in denunciation of Senator Seward's "bloody programme" of the Presidential contest for 1860. As the co-partnership efforts of these same hopeful jokers, though lately brought to bear, with great parade and loud trumpet-sounding, against Senator Douglass, failed to effect the overthrow of that gentleman; so it is barely possible—is it not?—that they may also fail in their combined assaults upon the New York Senator.

The trouble with the Union, it is plain enough to see, grows out of the clear and thorough exposition by Mr. Seward, of the shameful alliance of the Slave Democracy with the Slave Power. There is no such thing possible as a successful refutation of any one of the Senator's positions in regard to this odious alliance. This, the Union well knows, and is shrewd enough to forbear all attempts in that direction. Yet, though it has no shame, in its open and frequent advocacy of the "peculiar institution"—and being the acknowledged official organ of the Buchanan administration, all the while, mind you!—this same Union is most unwilling to have its fraction of a party damaged in the North, by what it knows, in its honest soul, if it have any, to be a correct and truthful representation. And so it joins Bennett in calling ill names, for lack of fact and argument.

If, however, as might easily happen, Senator Seward should not prove to be the Republican nominee for the next Presidency, what a waste of gaseous expletives and ill humor the Union will have to answer for!—and how much of its accustomed and favorite billingsgate and falsehood might have been just as well expended in other directions, or even saved altogether, by that pink of public journals, Bennett's N. Y. Herald!

The State law requires the City Clerk to make full returns of all deaths to the Secretary of State; in consequence of the negligence of the physicians in this city in making their returns according to law to the City Clerk, he has had great difficulty in making full returns to the Secretary of State. For the benefit of the Physicians we quote the following sections from one of the city Ordinances:—

Sec. 2. Whenever any person shall die in this city, it shall be the duty of the physician attending in his or her last sickness, to leave, within forty-eight hours after the death, at the last residence of such deceased person, a certificate stating the disease or accident which caused his or her death, which certificate shall be delivered to the undertaker who may conduct the funeral of such deceased.

Sec. 4. Every physician omitting or neglecting to leave such certificates as aforesaid, shall forfeit and pay the sum of five dollars for each offence.

The City Clerk, on application, will furnish the Physicians with the necessary blanks; and if they will fill them and deposit them with the City Clerk, they will materially aid in making the State record full and satisfactory.

The British Government have awarded Captain Renaud, of the French bark Maurice a gold medal in acknowledgement of the services rendered by him to the Hamburg steamer Austria, destroyed by fire at sea on the 18th ult., one of the persons whom he rescued being a British subject.

On Saturday night a man in Huntsville, Mo., was murdered by two negroes, who attacked him in bed with a poker and shovel, and mangled him horribly. The negroes were entitled to their freedom on the death of their master; and it is supposed they committed the deed for the purpose of securing it.

A resolution that no member shall be entitled to his *per diem* who shall be absent from his seat during the session without presidential cause, or leave of the Senate, was adopted in the Georgia legislature, so as to apply solely to the mover.

There are 2,000 newspapers published in the United States; 550 in Great Britain and Ireland; in Russia and Poland, 50; Asia, 30; Portugal, 26; Spain 24; Africa, 11; Australia, 10. Some compiler of statistics estimates.

The Halifax Journal says the mackerel fishery has, so far, proved almost a total failure at St. Margaret's Bay and its vicinity, this season, and, unless the fish "strike" within the next three weeks, great destitution must be the result.

A majority of the Supreme Court of Massachusetts have declared the jury law of that State, which makes juries judges of the law, in issues involved against the instructions of the Court, to be unconstitutional.

A vagrant woman gave birth to three children in a police station house at Cincinnati, Tuesday night.

Rarey, the horse tamer, is now at Stockholm.

The Trenton barbers are discussing the propriety of dispensing with Sunday work.

LOCAL NEWS.

TO THE PILOTS OF NEWPORT.—A few days since, we placed at the head of our Marine report, a paragraph, requesting the favor of pilots to give us immediate information of such arrivals as came under their notice, stating, at the same time, that we were also the accredited marine reporter at this port for the Associated Press, (which includes the Providence papers.) Everything of importance in the marine department that reaches us, is telegraphed the same day to the Providence papers—the *Journal* and *Post*, and also to Boston and New York.

Last evening, a whaling bark arrived at this port, and when the pilot came ashore, he brought an interesting report which he designed telegraphing to the Providence *Journal*, carrying it directly past our office, as we admit he had a perfect right to do, if he did not wish the *News* to get it. Hearing of this, we went immediately to the telegraph office, and endeavored to get it, designing to incorporate it into our report, which had not yet been sent to Providence, at the same time giving the *Dragonet* due credit for it. But here "the rules of telegraphing" did not admit of our doing so. The dispatch must be sent away precisely as written, unless we would hunt all over town and find the pilot to get his consent. We then endeavored to get a copy of it for our own columns and to forward to the New York papers, but the same "rules" forbid this, also, and so we were cut off on all sides, and the Providence papers were made to pay about one third more for the dispatch than if it had gone through our own report.

We submit to our friends the pilots, whether this is doing the thing exactly as it should be done, to send important marine intelligence to papers 30 miles away, instead of leaving it with us, so that addition to its being sent to Providence, their own townsmen, our readers, could also have the benefit of it.

We have no complaint against the telegraph office; they have their rules and must of course adhere to them. But we are stationed here as marine reporter to the Associated Press, and it seems no more than right that marine intelligence, when sent, should be sent through our office.

By their neglecting to do this, the Providence papers are frequently subjected to the expense of two dispatches conveying the same intelligence—from us and the pilots, when it might all be done in one.

For several weeks past, some of the Irish people of this city have had rallies at their houses on Saturday nights; latterly, on two or three occasions, there have been disturbances and the police were called for. A woman made application to Mayor Cranston on Saturday last, for permission to have a rally; the Mayor informed her that the law prohibited rallies, and that if she attempted to have one, he should break it up. She persisted, and about ten o'clock the Mayor, with a posse of Police, entered the house; all kinds were assembled, young and old, men and women, black and white. The fiddler was doing his best, and the company were busily engaged in a regular "break down." As soon as the Mayor was discovered there was a scattering in all directions, but he prevented their egress. He then gave them notice that if he heard of any more such gatherings he would arrest all who might be present; and, after giving them some good advice, permitted them to leave the house. Some of them, however, were determined not to be thus disappointed; consequently they waited until late hour, and then returned to the house, and about four o'clock Sunday morning, they became so noisy that the Watch entered the house and arrested the woman in command, and two men, and committed them to the Watch House. The woman was crazy drunk, and in her enthusiasm broke all the glass in the window of her cell, giving as a reason therefore, that she supposed she could escape—but after breaking the glass she found that many heavy iron bars without were an insurmountable barrier to her freedom, and she then fully realized the truth of "Lore's labor lost." Monday morning the Mayor ordered her to be committed to the Asylum, where her husband has been for the last three months.

THE MEN'S PRAYER MEETINGS.—The time for holding those meetings has been changed. Hereafter the meeting will commence at quarter to 6, P. M., and continue till quarter to 7—one hour. This change has been made to accommodate a greater number of people who wish to attend the meetings. They will be held in Music Hall, Narragansett Building, as usual, and all (including ladies) are invited to attend.

This evening, as we learn, Henry Allen Cook, formerly a teacher in this city, will be set apart by solemn ordination to the gospel ministry, in the Rev. Dr. Jackson's church, Clarke Street, at 7 o'clock. Sermon by Rev. William C. Richards, of Providence.

THE HALIFAX JOURNAL says the mackerel fishery has, so far, proved almost a total failure at St. Margaret's Bay and its vicinity, this season, and, unless the fish "strike" within the next three weeks, great destitution must be the result.

A majority of the Supreme Court of Massachusetts have declared the jury law of that State, which makes juries judges of the law, in issues involved against the instructions of the Court, to be unconstitutional.

BLACKWOOD'S.—For November has been received at this office, and is, as usual, rich in contents. B. J. Tilley has it for sale.

LOCAL NEWS.

TO THE PILOTS OF NEWPORT.—A few days since, we placed at the head of our Marine report, a paragraph, requesting the favor of pilots to give us immediate information of such arrivals as came under their notice, stating, at the same time, that we were also the accredited marine reporter at this port for the Associated Press, (which includes the Providence papers.)

This is a continuation of those serials issued from the press of Messrs. Gould and Lincoln, designed expressly for youth. It is an attractive story, suggestive of a moral on every page. We know of no more appropriate gift to a young person than would be this little volume. Ward has it for sale.

Under our Marine head to-day, will be found the particulars of a sad marine disaster in Long Island Sound. It occurred during the severe blow of Sunday, Monday and Tuesday of last week. Faulkner's Island is a mere speck in the Sound, and vessels anchor there only when unable to reach any other anchorage. We lay there once in a small sloop during a heavy northwest blow, and wish to be delivered from ever again experiencing the anxieties of that night.

NOTICE TO CONTRACTORS.—Sealed proposals will be received till January 1st, 1859, for building a bridge on the sidewalk of Thames Street, where it crosses the head of Swinburne's Wharf. Said bridge must be of the best granite, with piers of the same material, and warranted to stand a hundred years. Apply to all the ladies of Newport.

The Answer.

The following has been handed us by George Burroughs, Esq., Chief Engineer of the Fire Department. We presume it will prove entirely satisfactory to "All the Fifth Ward."

New York, Nov. 27th 1858.

GEORGE BURROUGHS, Esq.—
Dear Sir:—I am sorry to inform you that Engine No. 7 is not quite completed; the painter has promised her to me next Thursday, and if I get it then, I will be able to send it up on Friday or Saturday. I suppose they think it a long job, and so it is; but it requires time to paint an engine, especially if it is properly done, and I think they will be pleased with it when they see it.

Respectfully Yours,

JAMES SMITH.

Four Days Later

FROM EUROPE.

ARRIVAL OF THE NORTH BRITON.

PORTRIDGE, Me., Nov. 28, 1858.

The Canadian Steamship Company's screw steamer North Briton, Capt. Thomas Jones, from Liverpool at 4:12 p.m., on Wednesday, the 17th inst., arrived here at 3 o'clock this morning.

The North Briton has made the passage in ten and a half days. Her advices are four days later than those by the Africa at New York.

The North Briton passed on the 19th inst. a steamer bound east, supposed to be the Anglo Saxon from Quebec for Liverpool.

The Cunard steamship Europa put into Quebec on the 16th inst., for coal, and sailed again on the morning of the 17th for Liverpool, where it was expected she would arrive on the 18th. She had on board the crew of the Hamburg schooner Bertha, whom she picked up at sea.

No news had been received of the steamer Indian Empire, which left Halifax (where she put in for some repairs) for Galway on Oct. 29.

The steamer Ariel, from New York, reached Southampton at noon on the 17th inst.

Heavy easterly gales had pervaded around the English coast, and numerous marine disasters, with loss of life, were reported. The French mail steamer at Dover broke from her moorings, and ran over to Boulogne for safety, without the mails and passengers. No American vessels were among the sufferers.

Some anxiety is felt for the safety of the ship Agincourt, now 118 days out from Melbourne, with £283,000 sterling in gold. Five guineas per cent is asked for insurance on her.

The Times, in an article on the Atlantic Cable, says:

"Should any improvement take place when the shore end is added, there are many who profess themselves confident of working through the whole wire, for some time to come at least. Foremost among those who express this opinion is Professor Hughes, whose printing telegraph is now extensively used in the United States, and which will, also, in the course of a few weeks more, be introduced into Australia, to work the first submarine telegraph in that colony between Tasmania and Melbourne.

Prof. Hughes states that he is confident of being able even now to signal through the Atlantic Cable, and is anxious to conduct all experiments upon the wire at his own expense. The Atlantic Telegraph Company, on the other hand, say they have no disinclination to permit Prof. Hughes to try his skill, yet, strange to say, though both parties are willing, nothing is done.

Nevertheless, now, however, that the matter is made public, Prof. Hughes may feel bound to press his offer, and the Atlantic Company, in fairness and in duty to the shareholders, will, perhaps, see the necessity of at once accepting a liberal proposal. Whatever way it results can do them, or their cable, no manner of injury, but, on the other hand, may possibly be of immense benefit.

The Times then proceeds to explain the Hughes system and its obvious advantages, and says his offer should be decided by actual tests, and the sooner the better.

INDIA.

The Bombay mail of the 26th October reached Suez on 8th inst.

Several scattering encounters with the rebels were reported, but nothing important.

Several actions had been fought near Lucknow, and a large number of the rebels destroyed.

The health of the British troops was very satisfactory.

Tanta Topee had retreated from Ismailpur, first setting fire to the town, and entered Chindia on the 21st of October. A portion of his forces was afterward encountered by Gen. Michaelis, and easily routed, with the loss of all their baggage.

The plan of the campaign which was about to commence, shows that Lord Cliffe intended to surround and destroy the rebels.

Miscellaneous.

HAMPTON LANDS,
NEW ENGLAND SETTLEMENT.

ONE OPPORTUNITY.—TO ALL
WANTING FARMS.—In a healthy place,
near the Atlantic railroad, New Jersey,
A. H. Bliss has recently been opened for
the first division of 10,000 acres divided
into farm lots of twenty acres and upwards.
The soil is of the best quality for the
culture of fruits, grain, &c. The price is
\$1.50 per acre, payable in easy quarterly
installments, within a term of four
years, with interest. The terms are made
so as to insure the rapid & progressive
development of the land, by enabling every industrious man to farm. It is now being ex-
tensively improved by good roads, and some
of the citizens from New England and
the Middle States are erecting large improve-
ments. It is a store of the greatest im-
portance of Philadelphia. Seventy houses
are built or in course of construction. Practical far-
mers, tradesmen from the length and
breadth of the Union are settling there. It is an
ideal emigrant's place, on account of its
natural wealth of a great market. Every arti-
ficial convenience finds an immediate
market. Water is excellent, and such thing
as are known.

Swain's Candy or clay loam, with active
and retentive qualities of manure. It is free
from salts and easily worked. It abounds largely
in organic matters, and such is its fertility
that the crops produced both upon this
land and the large areas adjoining under culti-
vation will be found not to be exceeded among
the production of crops most adapt-
ed to the market.

The cost of labor may be well aware that the car-
ries the best fruits and vegetables come
from New Jersey, which are annually exported
to the amount of millions of dollars. The
land is easily accessible in every way
to settlers, has a abundant supply of the
best quality of manure.

The day and building materials can be had
on credit at a cheap price from the mills,
the houses are now being opened, and blocks
are constantly on the ground. A person
can get up a frame-temple for present con-
venience for one hundred dollars. On
account of the extensive migration, this is the
best time to purchase in order to get a place
at the first. Carpenters and build-
ers will have hard to put up houses on the best
terms.

The emigrant here the emigrant has many ad-
vantages. He is within a few hours' ride of
the cities in the Middle States and New
England. He is near his old friends and asso-
ciates in a settled country, where ex-
periment and comfort of civilization is
surely to be in a healthy place, and is not
subject to the certainty of losing the greater
part of his family and亲朋 health by those
pestilential fevers which make the graves of so
many millions of the young and hardy in far
countries away from home and friends. Be-
cause he has a mild climate and an open
country gives him free ticket.

The subscriber will be at once struck with the
advantages here presented, and ask himself
whether the property has not been taken up before.
This is not so. It was never thrown in the
market; and unless these statements were
coupled no one would be invited to examine the
land before purchasing. This all are ex-
plained. They will see the land under
cultivation, then will meet persons, &c., doubt-
ful of their own neighborhood; they will wit-
ness the improvements, and can judge of the
character of the population. Persons should
come prepared to purchase, as many are le-
aving, and locations are not held on refusal.

The Hammon Farmer, a monthly Lit-
erary and Agricultural sheet, containing full
information of Hammon, will be sent to
each subscriber, and can be obtained at 26 cts
per month.

The indispensable Warrantee deed given,
the usual assurance, when purchasing money
order. Route to the land:Leave Pine street
at Philadelphia, for Hammon by rail-
way, 1/2 A. M., and 5-1/2 P. M.; when
arrived opposite Mr. Byrnes' Boarding con-
cerns will be found. Letters and applica-
tions to be addressed to S. B. COUGHLIN,
22nd FIFTH Street, below Walnut, Phil-
adelph. Maps and information cheerfully
offered.

Also, SWAIN'S VERMIFUGE.
A valuable Family Medicine, being a highly
approved remedy for all diseases arising from
disease of the digestive organs, such as
Worms, Cholera Mortis, Dysentery, Fever
and Ague, Bleeding Piles, Skin Headache,
&c. &c. See the Pamphlet (which may be
had gratis) accompanying the Vermifuge.

Prepared at SWAIN'S LABORATORY, 27
THE OLD STAN, Seventh street, below Chest-
nut, Philadelphia, and sold by all the respect-
able Druggists in the United States.

CAUTION TO THE PUBLIC.

Persons wishing to obtain the genuine
SWAIN'S PANACEA and SWAIN'S VERMIFUGE,
should be careful to observe that the name
SWAIN

is spelled correctly on the bottle and labels,
or they may be imposed on by medicines
made in imitation of them by a person bearing
a somewhat similar name, will be calculated to
deceive.

General Agents for the United States.

A CARD TO THE LADIES.

Dr. Dutton's Golden Periodical Pill for
Female. Perfectly harmless, yet wonder-
fully and powerfully efficacious in correcting
regulating, and removing all obstruction
from whatever cause.

All medical men know, as well as many others,
that no female can enjoy good health, unless
she is regular; and whenever an obstruction
takes place, whether from exposure, cold,
or any other cause, the general health begins
immediately to decline, and the want of such
a remedy has been the cause of so many com-
plaints among young females. Headache,
Pain in the Back, Palpitation of the Heart,
Lassitude of Food, and Distorted Sleep, do
most always arise from the interruption of na-
ture; and whenever that is the case, the Pill
will invariably remedy all these evils; and may
always be used successfully as a preventive.—

Price \$1 per Box. For sale at 132 Thorne
street, corner Church and, and at 12 Wash-
ington Square, opposite the House. Order
for the trade so as to be supplied at lowest
manufactur'd price. Sold by en-
closing \$1 to STURGIS & CO., Box 891, New-
port Post Office, can have the Pill sent con-
fidentially by mail to any part of the city or
country.—26—
